Location Date/Time Deaths & Property & Event Type and Details Injuries Crop Dmg

The Muscatatuck River at Deputy crested around 23.4 feet at 11 AM EST on February 6. Flood stage at Deputy is 20 feet. Minor flooding occurs at this level, with some county roads under water in northeastern Jefferson County.

A frontal boundary with strong upper level support brought heavy rains to south central Indiana on the night of February 5th and 6th. This caused flooding on the Muscatatuck River over the following days.

PERRY COUNTY --- TELL CITY [37.95, -86.77], 0.8 NW CANNELTON [37.93, -86.76], 0.2 WSW ROME [37.93, -86.52], 0.3 N DERBY [38.03, -86.53], 1.6 NNW TELL CITY [37.97, -86.78]

02/09/08 07:00 EST 0 Flood (due to Heavy Rain)

02/13/08 21:45 EST 0 Source: Official NWS Observations

The Ohio River at Tell City crested at 39.6 feet around 7 AM EST on February 11. Flood stage at Tell City is 38 feet. Minor flooding occurs at this level, with the river overflowing both banks above and below the gage. Indiana Highway 66 floods between Rome and Derby.

Heavy rains on the night of February 5th and 6th caused rises on many area streams and rivers. By February 9t, this caused minor flooding on the Ohio River at Tell City.

02/11/08 16:00 EST 0 Winter Storm

02/12/08 16:00 EST 0

Snow changed to sleet and then freezing rain during the overnight period and early morning hours Tuesday February 12. Between 2 to 4 inches of snow fell across extreme southern Indiana along and just north of Interstate 64 from Dubois county eastward through Clark county. Freezing rain developed later in the morning on Feb 12th and deposited an average of 1/4 of an inch of ice across all of south-central Indiana.

(IN-Z076) ORANGE, (IN-Z077) WASHINGTON, (IN-Z078) SCOTT, (IN-Z079) JEFFERSON, (IN-Z083) DUBOIS, (IN-Z084) CRAWFORD, (IN-Z089) PERRY, (IN-Z090) HARRISON, (IN-Z091) FLOYD, (IN-Z092) CLARK

02/21/08 13:00 EST 0 Ice Storm

02/22/08 00:00 EST 0

Southwest flow and moisture overran arctic air near the surface. Sleet developed by late morning and quickly changed to freezing rain while temperatures held steady in the mid 20s. All of southern Indiana experienced icing amounts between 1/4 to just over 1/2 inch. A couple of our northern counties experienced up to an inch of sleet prior to changeover. Most public schools closed early. Many accidents were reported and side roads became nearly impassable.

Thunderstorm winds did severe damage to a home and rendered it uninhabitable.

MONROE COUNTY --- 1.2 WSW BUGTUSSLE [36.63, -85.89], 3.2 SE PERSIMMON [36.77, -85.59]

02/05/08 22:31 CST 3.70M Tornado (EF3, L: 19.60 mi , W: 440 yd)

02/05/08 22:50 CST 0 Source: NWS Storm Survey

The tornado crossed into Monroe County, Kentucky from Macon County, Tennessee. About two miles west of Gamaliel, the tornado destroyed two conventional homes and two mobile homes. Thirteen residents of the four homes took shelter in the basement of one of the homes. They escaped without injury, although they were trapped in rubble for 30 minutes. Several other homes were damaged in a subdivision a mile north of Gamaliel. The tornado ripped the roof off a brick home there. It tracked across rural Monroe County, uprooting and snapping large trees. On the north side of Tompkinsville, it destroyed a large wood frame warehouse and twisted a large steel frame metal building off its foundation. A nearby well built brick home had its roof and exterior walls swept away. It also destroyed a detached three car garage.

building along Ring Road. This building also suffered significant roof damage. At Central Hardin High School, the tornado snapped concrete pillar stadium lights at the football stadium. The press box was thrown on to the playing field and destroyed. The basketball gym and a wing of the school suffered roof damage consistent with an EF2 tornado. Along Black Branch Road just east of the school complex, the tornado caused some structural damage to homes.

The tornado touched down near 812 Mt. Vernon Road, damaging a home and a barn at that location. Along Connersville Road, the tornado lifted the roofs off three homes and damaged three others. It also destroyed several barns and outbuildings, and snapped numerous hardwood trees. It damaged a few more barns and trees before lifting about a half mile southwest of Cynthiana. Several businesses in the city of Cynthiana had sign damage from 70 mph straight line winds.

The first damage occurred two miles west of Carlisle where straight line winds blew the roofs off a barn and a trailer, and a manufacturing company suffered significant roof damage. Tree and barn damage occurred on KY 32 and KY 1455 north of Carlisle. The most significant damage happened three miles northeast of Carlisle near the intersection of KY 32 and Stoney Creek Road. A small barn was completely destroyed and blown into the highway. Several other barns had their roofs removed. A car was blow 15 feet into a telephone pole by the winds.

Thunderstorm winds downed trees and power lines along Dixie Highway in the Watson Lane area. Parts of Dixie Highway were blocked.

A cold front along with a strong upper level low produced a squall line that crossed central Kentucky. This set off widespread severe weather, and spawned several tornadoes.

Snow developed during the late afternoon on February 11th and continued until late evening. A swath of 3 to 4 inch accumulations fell across Hancock...Northern Breckenridge...Meade and Jefferson counties eastward along interstate 64 through the northern Bluegrass region. Freezing rain later developed across northern Kentucky during the pre-dawn hours on February 12th. Ice accumulations ranging from 1/4 of an inch to just under 1/2 of an inch were common until temperatures rose above freezing by late morning. Ice accumulations brought minor tree damage. The snow and freezing rain lead to numerous school and activity cancellations.

Southwest flow brought moisture which overran arctic air just above the surface. Sleet developed during the late morning hours and quickly turned to freezing rain. Initial freezing rain accumulations developed across central Kentucky. Near rush hour...a wide area of freezing rain moved east along and north of Interstate 64. Ice accumulations of over 1/4 inch were widespread. Many accidents were reported during the evening hours. Ice accumulations did not heavily damage trees...but did account for several power outages.

The Rough River at Dundee crested at 25.8 feet around 10 AM EST on February 23. Flood stage at Dundee is 25 feet. Minor flooding occurs at this level, with a section of Kentucky Highway 69 flooded near the bridge.

Moderate to heavy rains fell over the Rough River basin, mainly on February 21st and 22nd. These rains fell on already saturated grounds, so minor flooding on the Rough River at Dundee resulted.
